

## STS-1 Splitter Assembly Additional Hardware Installation Instructions

Document Number 1000-A2-GZ40-00

October 2003

### Overview

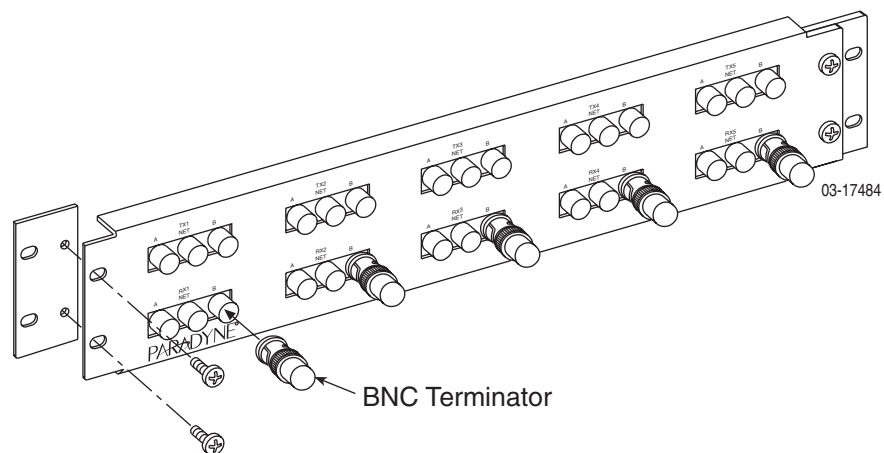

Cabling of the STS-1 Splitter Assembly (feature number 1000-A1-000) is described in *Jetstream CPX-1000 Voice Services Platform Installation and Operation* (document number 1000-A2-GN22).

This document describes additional hardware shipped with the splitter assembly:

- BNC Terminators
- Brackets and screws for 23-inch rack installation

### BNC Terminators

Five BNC terminators are shipped with the splitter assembly. These must be installed on any unused RXB connectors on the splitter, as shown in the following illustration:

### Screws and Brackets

The screws and brackets shipped with the splitter assembly are for use when the assembly is installed in a 23-inch (584 mm) rack. They are not required when the splitter assembly is installed in a 19-inch (483 mm) rack.

Attach the brackets behind the left and right sides of the splitter assembly faceplate using the provided screws.
