

MCC Card and Firmware Revision Compatibility Verification Instructions

Document Number 8000-A2-GK43-00

March 1998

Overview

This document contains information that will help you to determine if you have the appropriate firmware revision to correspond with your MCC card. Firmware is available for downloading from the Paradyne Power Pages.

MCC Cards and Firmware Revisions

In order to determine what firmware you will need to download from the Paradyne Power Pages at <http://www.paradyne.com>, you need to verify what version of MCC hardware you have on the General Information Screen of your DSLAM system. Access the General Information Screen using the following path from the Hotwire MCC Main Menu:

Monitoring → Card Status → Card Info (B-A-A)

The hardware revision information appears on the bottom right side of the screen. (The revision number is a shortened version of the full part number; that is, without the 868 extension.) Use the following table to verify that you are downloading the proper firmware version for your hardware.

If you have this card type . . .	And this hardware revision . . .	You should download this firmware revision . . .
MCC	1010-80A	02.00.22
MCC (expanded memory)	1010-81A	02.01.05
DSL (8546)	1004-80A	02.00.22
DSL (8540)	1178-80A	01.00.23
NOTE: Combinations of firmware and hardware not specifically identified in this table are not supported.		

CAUTION:

Some MCC cards shipped in January and February may display incorrect hardware revision information. If you received the MCC card during this period, check the label on the back of the MCC card for the actual hardware revision.

If there is a discrepancy between the displayed and labeled hardware revision, use the hardware revision on the label to determine which firmware file to download.

Please contact your sales or service representative if you want to have the MCC card factory updated to display the correct hardware revision.

- For the MCC, the CCA (circuit card assembly) number is 868-1010-80xx.
- For the expanded memory MCC, the CCA number is 868-1010-81xx.

To download the appropriate firmware revision, access the Paradyne World Wide Web site at:

<http://www.paradyne.com>
