Model 8922 POTS Card Firmware Compatibility Notice

Document Number 8922-A2-ZK40-10

January 2006

Do Not Install This Card Until You Have Checked Firmware

Do not install this card into the Broadband Loop Carrier (BLC) until you have verified that you have the proper firmware in your SCP card. To determine the firmware level using the web interface, select *System->Firmware*. Check the Running Firmware field.

The minimum revision of firmware required is:

- **03.03.00** for SCP cards with ATM uplinks
- **04.01.00** for SCP cards with IP uplinks

If your SCP card is at a firmware revision below the revision listed above, an upgrade is required before you can install the 8922 POTS card. Contact your technical support representative to obtain the latest SCP card firmware.

E-mail	support@zhone.com
Telephone (North America)	877-ZHONE20
Telephone (International)	510-777-7133
Internet	www.zhone.com/support

After downloading and switching to a valid firmware release, immediately download at least the minimum firmware level into the alternate firmware bank to prevent an inadvertent switch to the wrong level. Then proceed with the installation of the line card.
